NVQ Circular: 03/2011

**Equivalence of National Certificate in Technology (NCT) (Civil Engineering)  
to NVQ Level 5 Construction Technology**

1.0 National Certificates in Technology (NCT) is a three year part time course conducted by the Department of Technical Education and Training for those who are employed in the relevant industry. Practical experience is expected to be gained through full time work experience during the course.

On the request of the Department of Technical Education and Training, NCT (Civil Engineering) course was mapped with NVQ Level 5 Construction Technology Course.

2.0 Having considered the recommendation of the NVQ Steering Committee, based on the evaluation report, the Tertiary and Vocational Education Commission at its board meeting held on 24 November, 2010 decided as follows:

- The NCT (Civil) curriculum implemented in year 2001, does not include construction of Bridges, Manage Workplace Information and Manage Workplace Communication when compared with NVQ Level 5 Construction Technology curriculum. However, the committee is satisfied with the extent of mapping.
- Candidates shall apply to TVEC with a report containing the record of relevant work experience of not less than 03 years duration during the period of following the NCT Course. The work experience must include Management of Work Place Communication and Management of Work Place Information. The work experience must be in a worksite of a contractor with minimum C 5 registration with ICTAD or of a government department handling construction work.
- All candidates shall appear for an interview for verification of documents and for any other clarifications.
- Successful candidates will be issued a Certificate of Equivalence to NVQ Level 5, Construction Technology.

The provision is effective from 01 January, 2011.
