

**Tertiary and Vocational Education Commission**

**NVQ Circular No. 06/2024**

To all accredited training providers,

**Underutilization of trainees in Accredited Training Programmes**

Underutilization of student capacity in Accredited Training Programmes has become a major issue in the Market Driven "Technical and Vocational Education and Training (TVET) Sector". NVQ programmes are designed and delivered to meet industry skills requirements.

In 2023, 58% of the overall student capacity was utilized and by 2025 it should be increased up to 70% of the total student capacity. 187 accredited courses were enrolled below 50% of the total capacity of which 60 courses were not enrolled a single student during the year 2023.

Actions must be taken by training providers to enroll students in the respective accredited courses listed in the annexure and utilize the TVEC's allowed student capacity.

Student enrollment and performance will be key performance indicators for renewal of course accreditation and TVEC's future monitoring functions.

This circular is effective from 01/05/2024.
